

Ginkgo

Retail

Bringing empowerment and efficiency to E-commerce

Ginkgo Retail is an Ecommerce Operating System. A one stop solution for merchants who want to increase their efficiency and maintain control over their business through automations & AI. From Order Management, Inventory Management, Logistic Management, Warehouse Management, Customer Relationship Management , Track IT, Business Intelligence Reporting, Product Management and Multi-sales/Multi-vendor module, Ginkgo Retail does it all for smooth E-commerce operations with advanced automations.

PROBLEMS

Lack of Automation

The lack of a central automation platform for managing core ecommerce operations resulting in high infrastructure cost and human dependency.

Decentralized Systems

The lack of communication between online and offline systems causes difficulty in focusing core areas of ecommerce.

High Operational Cost

In the ecommerce industry, each business process needs to be catered by multiple softwares which is ideally not a cost efficient solution.

Dependency on Traditional Systems

The traditional rigid systems are not able to adapt to the fast paced changing needs and demands of the customer.

PROBLEMS

Courier Integrations

and many more

Store Fronts

IVR Calling /
Email & SMS Notifications

Too many screens?
And no time to go through them all

Multi Sale Channels

ERP Integrations

Multi Vendors

MODULES & FEATURES

WHY GINKGO RETAIL?

Same Day Delivery

Ginkgo Retail ensures same day delivery of parcels to the customers through smart logistic and real time auto fulfillment services

Multiple integrations at one place

Ginkgo Retail is the only solution which provides multiple integrations with diversified automations at one place

Reduction in Interstore Transfer

No need to worry about transferring stock between stores to process maximum number of orders

Optimized Order Journey
